UNITED STATES GOVERNMENT

Memorandum

TO : DAD/IO

DATE: 9 Dec 1964

FROM : DAD/S&D

SUBJECT:

Carl, I feel the problem here is one of realibility. A certain number of these things just won't retro-fire. Consequently, you'll end up dropping your reconnaissance equipment on somebody elses soil. If this were not a concern, then normal ground installations should be feasible.

Did you have some other type of application in mind?
